Dear Prof. Carollo,

We have given most of our statements orally in the context of a discussion. Providing you with specific statements without the context would not be constructive and overall it is not our policy to distribute HK or SL-statements.

In this regard, you will be contacted by the president who will also provide you with additional information in a broader context. What I can say at the moment is that neither your name nor Simon's will appear in the newspaper.

Kind regards,

[REDACTED]

Liebe Alle

Bin mir nicht so sicher, ob wir Frau Carollo unserer Statements schicken wollen, zumal wir nicht wissen, welche Quotes Donzé überhaupt gebrauchen wird (wohl kaum alle). Was meint ihr?

Viele Grüsse, [REDACTED]

Dear Professor Weidmann, Dr. Lerch, Mr. Borer, Mrs. Schmid,

I have now been contacted directly by email by the NZZ journalist (see below). I thought I could (1) either ignore the request, or (2) tell the journalist to contact the ETH HK who will be able to address his enquiry. Please could you let me know which of these two options you advise?

I fully trust that my university will make a public statement that will protect me as a professor, together with the institution.

Thank you and best wishes,

Marcella Carollo
